D. Procedures/Activities
1. Before students enter the room, write the following words on a word web on one overhead transparency: *ancestor, instinct*. On the other overhead, write the following scenario: You are stranded in the middle of a deep forest. The sun is about to set for the evening. It is windy. For supplies, you have the clothes on your body, the forest around you, and your brain. You also have a backpack. Inside your backpack is a 10” knife, one match, a 10’ rope, and one can of tomato soup (no opener!). You do not know when you are going to be rescued. In the distance, you hear a fierce growl. You know that there are hungry animals in this forest and that you must be prepared to protect yourself. Explain how you are going to survive one week with your limited supplies – and your unwelcome predators.

2. As a class, brainstorm different scenarios in which these words might affect life. For example: How might your *instincts* affect you life? Possible answers may be: I can sense when I am in danger, I can tell when I am being watched, etc. Note: When working with *ancestor*, be sure to touch on the idea that information is passed down from one generation to the next and has been since the beginnings of time. Lead them to the idea that humans rely (most of the time anyway) on the mistakes and triumphs of previous generations.

3. When finished with that exercise, place the scenario on the overhead projector. Allow students 5-10 minutes to complete the writing assignment. Be sure to remind students not to forget information that they have learned from ancestors and instinct. Ask a few students to share their responses when finished. It is essential to this exercise that students realize that, when taken from their civilized environment, they can survive……they have primitive instincts too.

4. Read chapters one and two out loud as a class.

5. Use Appendix K as suggested discussion questions as you move through the reading.
6. After reading the selection, assign students to groups of two or three. Provide each group with a dictionary. Allow them to look up the vocabulary words in the dictionary and complete Appendix B in pairs.

4. What happens to John Thornton and his friends while Buck is away hunting?

5. How does Buck take revenge? Would the “old” Buck react the same way if Judge Miller experienced the same fate? Explain your answer.

Part C: Essay

Trace Buck’s development or regression from his civilized life in Santa Clara Valley to the chilling final scene of the novel. Your essay should consist of at least five paragraphs. Each main point must be supported with quotations from the novel.
Rewritten Ending

Directions: Pretend that John Thornton had never been killed by the Yeehat Indians. What would have happened to him? What would have happened to Buck? Would Buck have answered the call of the wild, or would he have remained with Thornton? Write a 400-word rough draft of your new ending. Be sure to include a plan!
